Santiago (Tigo) Ponce de León

Product Design Engineer

+1 503-706-7254 · tigoponcedeleon@uchicago.edu · tigoponcedeleon.com · linkedin.com/in/tigoponcedeleon

EDUCATION

University of Chicago — B.A. Media Arts & Design and Computer Science
Expected May 2027
Chicago, IL

Coursework: Human-Computer Interaction, Internet Art & Web Design, Visual Systems
Honors: Spain Foreign Language Acquisition Grant — study in Madrid, Summer 2025

EXPERIENCE

Bluejay — Growth Marketing Intern
Nov 2026 - Present
San Francisco, CA

- Own Bluejay's voice on LinkedIn and X for the company and its founders, at a YC-backed AI agent testing platform whose customers include Google, DoorDash, and Navan.
- Write and ship the newsletter, customer case studies, and launch narratives, turning technical evaluation results into stories engineers and executives want to read.
- Lead SEO and GEO strategy: research what AI agent builders search for, plan long-form guides, and report monthly on organic growth and citation share in AI search.

Vicino AI — UX Engineer Intern
Jun 2026 - Aug 2026
Bellevue, WA

- Designed product experiences across key workflows for an AI-powered video and marketing platform, turning agentic creative concepts into user-centered interfaces.
- Built front-end UI components in React, bridging Figma designs and production code to accelerate design-to-engineer handoff.
- Shaped and documented the platform's visual language and interaction patterns into a scalable component library used across feature pages.

PantryPal — Product Designer and iOS Developer
Nov 2025 - Present
Chicago, IL

- Designed and built an AI mobile app that turns the ingredients a household already owns into personalized recipes, cutting food waste through inventory reuse.
- Shipped the production iOS app to the App Store in Swift and SwiftUI — designing and coding the same screens.
- Ran user interviews and usability tests between design rounds, and built the system they fed: wireframes through high-fidelity UI, now implemented in SwiftUI.

Next Level Drone Cleaning — Founding Visual Designer
Jul 2025 - Sep 2025
Kortrijk, Belgium

- Designed the complete visual identity for an early-stage drone-tech startup from scratch: brand guidelines, logo suite, and collateral across web, print, and pitch.
- Built the responsive marketing site (nextleveldronecleaning.be) with the founder, plus component libraries that held the team consistent without ongoing design help.

SKILLS

product	User Research, Wireframing, Interaction Design, Design Systems, Usability Testing
engineering	Swift, SwiftUI, React, HTML / CSS / JavaScript, Python, Git, Xcode
design	Figma, Prototyping, Adobe Creative Cloud
languages	Spanish — professional working, English — fluent
