# Santiago (Tigo) Ponce de León

Product Design Engineer

+1 503-706-7254 · tigoponcedeleon@uchicago.edu · tigoponcedeleon.com · linkedin.com/in/tigoponcedeleon

## EDUCATION

**University of Chicago** — B.A. Media Arts & Design and Computer Science
Expected May 2027
Chicago, IL

Coursework: Human-Computer Interaction, Internet Art & Web Design, Visual Systems
Honors: Spain Foreign Language Acquisition Grant — study in Madrid, Summer 2025

## EXPERIENCE

**Bluejay** — Growth Marketing Intern
Nov 2026 - Present
San Francisco, CA

- Run the LinkedIn and X content calendar for the company and its founders at a YC-backed QA platform that simulates and monitors AI voice and chat agents.
- Write the newsletter, case studies, and launch stories, interviewing customers and turning technical evaluation results into posts that builders and buyers read.
- Plan long-form SEO and GEO content around the questions AI agent builders ask, and report monthly on organic traffic and citation share in AI search engines.

**Vicino AI** — UX Engineer Intern
Jun 2026 - Aug 2026
Bellevue, WA

- Designed product experiences across key workflows for an AI-powered video and marketing platform, turning agentic creative concepts into user-centered interfaces.
- Built front-end UI components in React, bridging Figma designs and production code to accelerate design-to-engineer handoff.
- Shaped and documented the platform's visual language and interaction patterns into a scalable component library used across feature pages.

**PantryPal** — Product Designer and iOS Developer
Nov 2025 - Present
Chicago, IL

- Designed and built an AI mobile app that turns the ingredients a household already owns into personalized recipes, cutting food waste through inventory reuse.
- Shipped the production iOS app to the App Store in Swift and SwiftUI — designing and coding the same screens.
- Ran user interviews and usability tests between design rounds, and built the system they fed: wireframes through high-fidelity UI, now implemented in SwiftUI.

App Store

**Next Level Drone Cleaning** — Founding Visual Designer
Jul 2025 - Sep 2025
Kortrijk, Belgium

- Designed the complete visual identity for an early-stage drone-tech startup from scratch: brand guidelines, logo suite, and collateral across web, print, and pitch.
- Built the responsive marketing site (nextleveldronecleaning.be) with the founder, plus component libraries that held the team consistent without ongoing design help.

## SKILLS

| | |
|---|---|
| product | User Research, Wireframing, Interaction Design, Design Systems, Usability Testing |
| engineering | Swift, SwiftUI, React, HTML / CSS / JavaScript, Python, Git, Xcode |
| design | Figma, Prototyping, Adobe Creative Cloud |
